1 The magnification mirror added to the three slanted mirrors for checking eye makeup

The magnification mirror added to the three slanted mirrors for checking eye makeup

For checking your eye makeup perfectly!

Aren't you concerned about how your eye makeup looks when you are on the way to work or having a date? The mirror assures perfect checking of your eye makeup even to the rim of your upper eyelids you cannot directly see. You can quickly check your eye makeup from three different directions to finish your eye makeup so sophisticated and fine.

Usage

- 1 Open the mirror as illustrated on the right and set the top mirror surface opposite to the bottom mirror surface.
 - 2 Move your face close to the mirrors and look into the mirrors.
 - 3 The top mirror reflects your "upturned eyes". Convenient for drawing eye lines on the rim of eyelids.
 - 4 The bottom mirror reflects your "downcast eyes". Convenient for checking the adhesion of false eyelashes and the eye lines already drawn.
 - 5 Finally you can check your eye makeup with the 3x magnification mirror. Convenient for checking the stain or failure of eye makeup with the magnified image.
- ★Adjust the slant of the mirrors according to your use.

Upturned eyes

Straight eyes

Downcast eyes

3x Magnification mirror

Plain mirror

Check your eye makeup!
Others may look at your eyes.

Points to be checked for fine eye makeup

- ★Are the false eyelashes attached tidily?
- ★Aren't the false eyelashes attached on a wrong position?
- ★Aren't your eyelids smudged with the mascara?
- ★Is the eye line drawn clearly?
- ★Is the eye shadow finely gradated?

Quadruple Mirror The 3x magnification mirror is made of a concave mirror having the radius of curvature (R) of 600.
[Precaution for use]The magnification mirrors may focus the sun's rays to burn up a combustible material and cause fire. So do not use or store the magnification mirrors under direct sunlight. *At first, move your face close to the magnification mirror and then move away from the mirror to find the focal point you can see clearly reflected image. *Do not look at the magnified image too long. It may cause eyestrain or make you feel sick.

*Do not give impact to the mirrors by dropping off, etc. Impacted mirrors may break and hurt the user. *The metal parts of the mirrors are deteriorated when stored at high temperature and humidity for a long time. *Chemicals sticking on the mirrors must be wiped off with dry cloth.

*Each of the "JAN codes" given in six digits in this catalogue constitutes the product code and check digit, and follows the code, 4510510 indicating the country and manufacturer codes.
