\*The 2x magnification and 3x magnification mirrors are made of concave mirrors having the radiuses of curvature (R) of 1000 and 600 respectively.

[Precaution for use] \*The magnification mirrors may focus the sun's rays to burn up a combustible material and cause fire. So do not use or store the magnification mirrors under direct sunlight. \*At first, move your face close to the magnification mirror and then move away from the mirror to find the focal point you can see clearly reflected image. \*Do not look at the magnified image too long. It may cause eyestrain or make you feel sick.
