

Maki-e Mirror

The mirror decorated by Maki-e
that is a Japanese traditional crafting technique

 MADE IN JAPAN

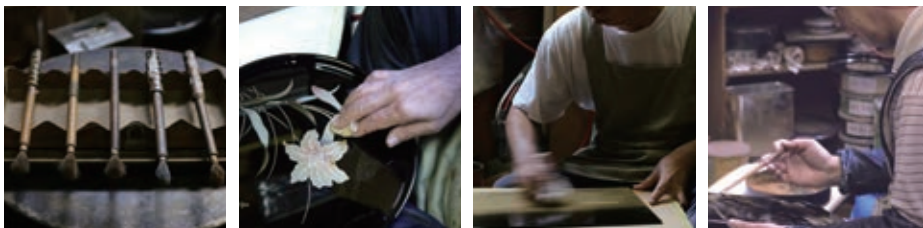

Namiurafuji

Maiko

Akafuji

Fuji•Sakura

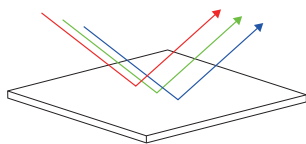

Maki-e is a typical Japanese lacquer work technique uniquely developed in Japan and has been used for about 1200 years. Patterns are painted with a slender brush and Japanese lacquer and gold powder is sprinkled on the wet lacquer to be fixed. Maki-e derives from “a pattern sprinkled with (gold powder)” in Japanese.

The compact mirror is the set of a 1X mirror decorated with Maki-e and a 3X magnifying mirror. The thin and light-weight product is convenient for carrying around. The 3X magnifying mirror has a curvature of 600R and reflects magnified image of the detail of your skin that is suitable for caring keratotic plugs, flecks and wrinkles. The product is a fusion of a Japanese traditional craft and our makeup mirror technology.

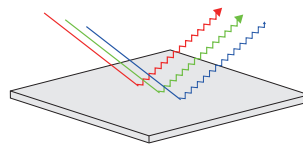

HORIUCHI MIRROR

HORIUCHI MIRROR is a special mirror patented in Japan and reflects your real appearance owing to its structure: a combination of highly transparent glass containing minimum iron to minimize color dullness and a reflection metal layer of high color reproducibility. Clearly reflected skin color teaches the best foundation color to users and enables greatly improved makeup. Thus, HORIUCHI MIRROR is accepted not only by consumers but also by professionals in the beauty industry.

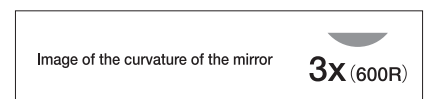

HORIUCHI MIRROR

The mirror of ultra-clear plate glass reflects natural and pure colors with minimum change.

Silver glass mirror

The blue light in the incident light is absorbed and many of the reflected colors look dull.
