Japanese Patent No.3732490

NEW

"Napure Mirror" PROFESSIONAL MODEL FOLDABLE STAND MIRROR PREMIUM

New Professional Model Foldable Stand Mirror with height changeable for makeup situation

Patented Foldable Stand Mirror
PAT.5764853

The adjustable slant improves convenience in use.

Slant adjustable into four levels for convenience in makeup

Slant adjustable into four levels
Normal form

Don't you use your stand mirror in this way?

A tissue box or book lifts the mirror used on a low table.

If you turn back the whole and fold the base of the mirror upward,

the mirror surface is raised by 85 mm to provide convenience in makeup.

Two forms for easy makeup

The mirror is raised by the folded base to be set right in front of your face.
Tall form

How to set the normal form

- ① Raise the mirror and fix the end of the mirror on one of the grooves A, B, C and D to slant the mirror to a level you like.

How to set the tall form

- ① Reverse the whole, raise the mirror and fold the base at the groove D.
- ② Attach the end of the mirror onto the part F. The magnet contained in the part F fix the end of the mirror.

What is "Napure Mirror"?

The mirror reflecting the real color of your skin as seen by others

The most suitable mirror for matching the colors of your skin and a foundation and for partial makeup

Glass of high clarity + Reflective metal layer by vacuum deposition =

"Napure Mirror" reflects natural pure colors with minimum change.

Glass of high clarity

The glass used for the conventional mirrors contains considerable amount of iron to absorb blue light of the incident light and make white color look dull. We have developed "Napure Mirror" made of clear glass with minimum iron content. "Napure Mirror" rarely changes the reflected colors to show natural and pure colors without influence by the glass. Thus "Napure Mirror" is the most suitable for matching the foundation to the colors of your skin and partial makeup.
